Bill Gates' Corona

Bill Gates appears to be the embodiment of the American dream, a self-made man who pulled himself up by the bootstraps. However, since the revelations of [Snowden and Julian Assange](#), many reputable experts have questioned that American big tech companies like Microsoft are truly independent from the government, and in particular, the deep state and military industrial

complex.

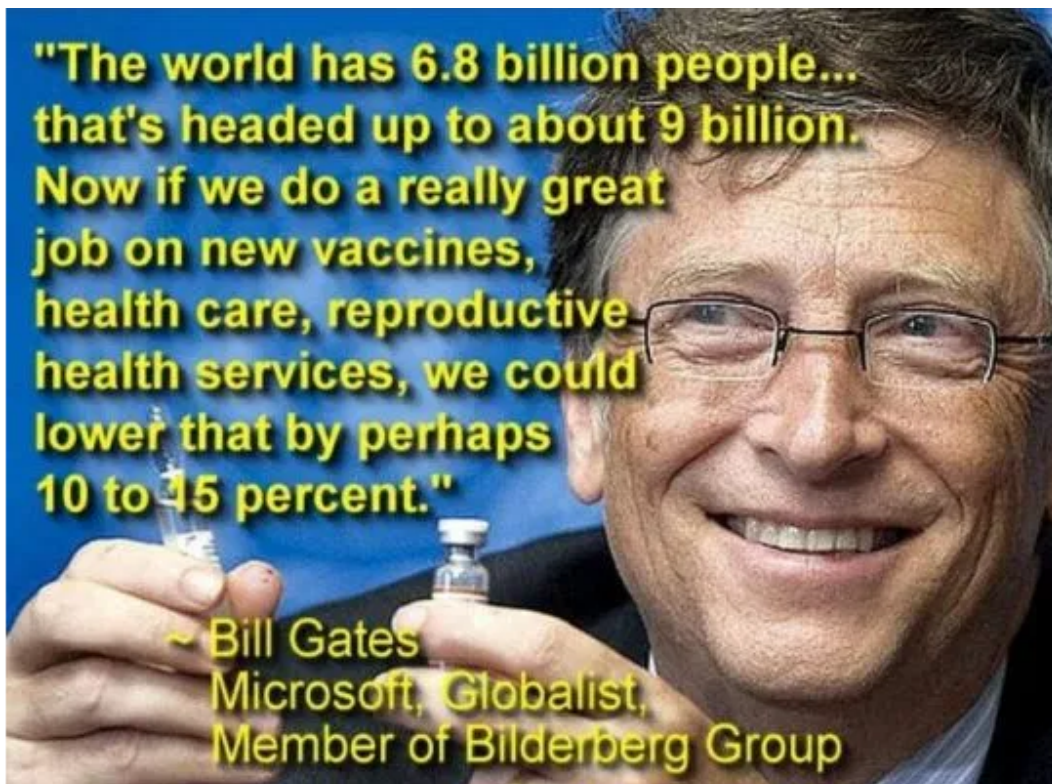

For instance, according to Edward Snowden, Microsoft allowed the NSA to collect communications data for analysis. The connections run deep.

Everyone should see this video:

However, Gates' ties with the US military are not only based around computer technology, but also on genetics. As the NGO Friends of the Earth noted in 2017 "Over 1,200 emails released under open records requests reveal that the US military is now the top funder and influencer behind a controversial genetic extinction technology known as "gene drives" pumping \$100 million into the field. The trove of emails, obtained through open records requests, also shed light on a \$1.6 million dollar UN gene drive advocacy operation paid for by the Bill and Melinda Gates Foundation." Jim Thomas of the ETC Group says that technology (for example genetically modified mosquitoes) may be used as potential biological weapons.

On a separate but not exactly unrelated note, the ties between Gates and prominent sex offender and pedophile Jeffrey Epstein, who mysteriously died in New York prison, are a testament to this “philanthropist’s” morality.

Jeffrey Epstein isn’t the only person connected to Bill Gates who died under mysterious circumstances. The grand-daughter of Robert Kennedy (nephew of former president John F. Kennedy and famous critic of Bill Gates) and her son were recently found dead. The details surrounding their deaths are anything but straightforward.

While there is no direct evidence to connect Gates to the coronavirus epidemic or prove he has any long-term nefarious goals, his actions and statements in light of the outbreak have given the world cause for concern. Take, for example, the recent performance of the scandalous artist Marina Abramovich (google her earlier work such as her “spiritual cooking”). She was featured in Microsoft’s new ad for a mixed reality headset, the HoloLens 2. After thousands of dislikes, Microsoft was forced to remove the video from its channel on Youtube.

In one of his latest posts, Robert Kennedy Jr., who is the son of Robert Kennedy and the nephew of the former U.S. president John F. Kennedy, makes clear, why he is no friend of Bill Gates:

A New York Times reporter asked me yesterday about the “conspiracy theory” that #BillGates is developing injectable chip to store vaccine records. Here are the facts:

The Bill and Melinda #GatesFoundation invested more than \$21 million to perfect a “microneedle technology” that embeds, under the skin, a vaccination record visible by infrared light that can be read by a “minimally-adopted smartphone technology.” The technology will allow health officials to scan U.S. citizens to detect their vaccination compliance.

A study funded by the Bill and Melinda #Gates Foundation and published in December 2019 by researchers from MIT, the Institute of Chemistry of the Chinese Academy of Sciences, and the Gates-funded Intellectual Ventures Laboratory in Bellevue, WA, describes how “near-infrared quantum dots” will be implanted under the skin along with a vaccine to encode information for “decentralized data storage and bio-sensing.” Gates’ technology uses a tattoo-like mechanism to inject invisible nanoparticles subcutaneously. Gates’ researchers are now testing the implant with a vaccine against the #COVID-19 virus.

Bill Gates Partners With DARPA & Department of Defense For New D...

The Gates-funded report boasts that the chip system will allow “house-to-house” compliance searches to be conducted by government enforcement teams with “minimal training,” and will “open up new avenues for decentralized data storage and biosensing.” The #MIT paper is titled “Biocompatible near-infrared quantum dots delivered to the skin by microneedle patches to record vaccination.” Gates began funding implantable tracking chips and radio biotechnology in 2011 with a grant to TransDerm Inc. Gates is currently making multiple investments to develop different versions, including grants to Vaxxas Pty Ltd, Micron Biomedical Inc, Georgia Institute of Technology, and Vaxess Technologies Inc.

I urge you to contact Bill Gates on his social media. Gently explain that tagging and tracking humans may appeal to his government cronies in totalitarian China, but those activities are inconsistent with American values and traditions.

[The people of the world have every reason not to trust Bill Gates:](#) a globalist, a crypto-Mathusian, a predatory capitalist. Given what we know about his life, ideology and interests, we should be more suspicious of the idea that he is simply altruistically interested in the betterment of mankind.

It is indicative that since the founding of the Bill and Melinda Gates Foundation, Gates’ fortune has only grown. The coronavirus pandemic is a major chance for him and others like him to

make an incredible money from vaccines and medicines while expanding their power and control. Given what we know about Bill Gates', do we really believe he will not take full advantage of this opportunity if he is able to?
